

David Iván Ventura Marín

Senior QA Engineer | Manual Testing | API Testing | Web & Mobile Testing | QA Lead

Guadalajara, Jalisco, Mexico

david.ivan.ventura.m@gmail.com | +52 3312326863 | linkedin.com/in/david-vm

Professional Summary

Senior QA Engineer with 10+ years of experience in software quality assurance across fintech, streaming, mobile, web, and enterprise environments. Strong expertise in manual testing, API testing, regression testing, exploratory testing, SQL validation, defect lifecycle management, and release readiness within Agile teams. Proven record of improving product quality, reducing production defects, increasing test coverage, mentoring QA teams, and collaborating with developers, analysts, and product stakeholders to deliver reliable digital products.

Core Competencies

- Manual Testing: Functional, Regression, Smoke, Sanity, Integration, System, Acceptance, End-to-End, Exploratory
- API Testing: REST, SOAP, Postman, request and response validation, authentication, error handling
- Web and Mobile Testing: Cross-platform validation for web, iOS, and Android applications
- Test Management: Test case design, test suites, regression packs, defect reporting, traceability, release validation
- Data Validation: SQL queries, backend-to-frontend validation, data integrity checks
- Agile Delivery: Scrum, Kanban, sprint planning, backlog refinement, cross-functional collaboration
- QA Leadership: Mentoring, process improvement, onboarding support, stakeholder communication
- Monitoring and Troubleshooting: Kibana, Grafana, New Relic, Charles Proxy, AWS

Professional Experience

DXC-Luxoft (AT&T / DIRECTV, QA and Data Analysis)

Senior QA Analyst Engineer

August 2025 – Present | Zapopan, Jalisco, Mexico

- Lead manual, functional, and API testing for DIRECTV streaming applications across web, mobile, and connected TV platforms.
- Validate user experience and business flows across iOS, Android, tvOS, Android TV, Amazon Fire TV, Roku, and smart TV ecosystems including Tizen, Kepler, and VegaOS.
- Design and execute test cases, test suites, and regression packs based on user stories, business requirements, and expected user flows.
- Perform REST API testing to validate status codes, response bodies, authentication behavior, and error handling.
- Use Charles Proxy for UI and API testing, including traffic inspection, header validation, payload review, and session analysis.
- Query data with SQL to validate streaming events, user entitlements, and content metadata between backend services and client applications.
- Monitor logs, incidents, and performance metrics using Kibana, Grafana, New Relic, and AWS to support troubleshooting and release validation.
- Analyze pre-production and production issues using logs, traces, and observability dashboards to identify root causes and service-impacting incidents.
- Report defects with clear reproduction steps, logs, network traces, and impact details, tracking issues through the full defect lifecycle.
- Collaborate with developers and product owners in Agile/Scrum ceremonies, contributing estimates, risk analysis, and release readiness feedback.

FEMSA Digital (Fintech Division)

Product Owner / Senior QA Analyst Engineer

May 2022 – April 2025 | Guadalajara, Mexico

- Defined and communicated product vision, roadmap, and priorities aligned with business goals and technical execution.
- Collaborated with stakeholders to convert business needs into user stories and acceptance criteria.
- Led backlog grooming, sprint planning, and review sessions to improve transparency, quality, and delivery timelines.
- Managed QA strategy across web, mobile, and API platforms, covering functional, regression, end-to-end, and exploratory testing.
- Championed QA automation initiatives that improved test efficiency and accelerated release cycles.
- Reduced production defects by 30% and increased test coverage by 45% through process improvements and QA discipline.
- Introduced OKRs and KPIs to measure team performance and support continuous improvement.

- Partnered with UX/UI designers and developers to validate prototypes and improve end-user experience.
- Mentored junior QA engineers and coordinated with cross-functional teams to strengthen Agile delivery practices.
- Maintained traceability of requirements and test cases in Jira and Confluence.
- Contributed QA analytics and customer feedback insights during roadmap planning discussions.

Improving

Software Specialist Engineer (SQA) / QA Analyst

April 2019 – May 2022 | Guadalajara, Mexico

- Executed manual testing for web and mobile applications on iOS and Android, including functional, regression, smoke, exploratory, acceptance, and system testing.
- Conducted API validation using Postman and RESTful services.
- Tracked and managed defects using Jira and Backlog.
- Standardized QA documentation and test processes to improve team efficiency and onboarding.
- Collaborated with developers and product teams in Scrum-based Agile environments.
- Reduced bug reopening rate by 35% through clearer defect documentation and stronger communication with development teams.
- Decreased reopened defects by 25% by adding a review step to the defect triage process.

Intel

QA Validation Engineer / QA Manual Lead / QA Analyst

October 2013 – April 2019 | Guadalajara, Mexico

- Led software validation efforts across Windows, Linux, and Android platforms.
- Managed and trained a QA team of up to 20 technicians.
- Applied Scrum methodology to improve project delivery and QA collaboration.
- Reduced onboarding ramp-up time by 40% through improved documentation and training.
- Conducted end-to-end validation for more than 10 key projects.

Technical Skills

- Testing Tools: Jira, HP Quality Center, QMetry, TestRail, Postman, Charles Proxy, xRay, Backlog, Asana, Raptor
- Monitoring and Observability: Kibana, Grafana, New Relic, AWS
- Databases: SQL, MongoDB

- Scripting and Automation: Python (basic), Selenium (basic)
- Platforms: Windows, Linux, macOS, iOS, Android
- Collaboration and Product Tools: Confluence, Figma, Google Workspace, Microsoft Office
- Version Control: Git (basic)

Education

Universidad de Guadalajara (CUCEA) — Bachelor's in Information Technology
Zapopan, Jalisco, Mexico

Universidad Tecnológica de Jalisco — Associate Degree in Information and Communication Technologies
Guadalajara, Jalisco, Mexico
